

Art Activity

Fun things to make and do with paper (1 - Collage) If you look at the pictures below by Matisse and Mrs. Mullen, you will see that they are made entirely from different papers. Look around your house to see how many kinds of paper you can find. (*Ask before you use it!*) The papers can include newspaper, insides of envelopes, brown paper, wrapping paper, greaseproof paper and tissue paper. You can use scissors or just rip your paper.

Tip- *if you don't have any glue at home you can use the white of an egg instead of glue. If you don't have a paintbrush you can use a piece of stiff cardboard instead.*

Easy	Intermediate	Challenging
<p>Look at and feel the different papers found in your home. Have fun ripping the paper and sticking them down anyway you like, you can also fill shapes in with your ripped paper if you like? You could get someone to draw these shapes bigger for you.</p> <div style="text-align: center;">    </div>	<p>Create an abstract picture with your paper. Try tearing the paper into shapes: can you make a circle, square, oblong, a wiggly shape etc. Stick your shapes down to make an interesting abstract picture. Check out these beautiful abstract collages by the Famous artist Matisse. <i>Or you could try filling the pictures below with your shapes?</i></p> <div style="text-align: center;">  <div style="display: inline-block; border: 1px solid black; padding: 2px; margin: 0 10px;"> Henri Matisse </div>  </div> <div style="text-align: center; margin-top: 20px;">   </div>	<p>Draw a rough sketch of your idea. Have a look at the paper you have collected, which papers will be best for your idea? Cut and tear, put in position first before you glue them down, it is best to do the background first. This is my cat Sadie; she isn't really this colour, but wouldn't it be nice if she was! I put some daffodils in my picture because it is spring. What will your picture be of? Experiment with different patterns, shapes and colours, get creative, have fun.</p> <div style="text-align: center; margin-top: 20px;">   </div>
