

Art Activity Easy to Intermediate

Fun things to make and do with paper No.3 (Making a collage flower picture and a collage flower in a pot) Get ahead of summer and have some colourful flowers in your house to brighten up your day! Tip -if you do not have glue at home you can use the white of an egg instead, it is surprisingly sticky! You can use a toilet roll tube instead of a paper cup. You can paint it a nice colour and add a fancy paper trim around the top of it. If you do not have any coloured paper, you can make your own by painting it or add colour using pens, pencils or crayons.

Materials needed: Sheet of stiff card, this could be an old cereal box. Coloured and/or patterned paper. Glue or the white of an egg. Intermediate level will also need: scissors, paper/polystyrene cup or toilet roll tube, a straw and sellotape.

Copy the flower shape onto the card or print a flower shape off from the internet (clip art colour in flowers).

Tear a piece of your scrap paper into little pieces and start gluing them onto the petal shapes.

Rip up your other pieces of scrap paper and glue them onto the other petal shapes, try to stay inside the shape. Add paper to the stem. (Easy -add some grass at the bottom).

Easy flower collage

Intermediate- cut your flower out once it has dried.

Sellotape a drinking straw to the back of your collage flower to give it strength.

Intermediate – pop your flower in a polystyrene cup or a toilet roll tube. You can paint the toilet roll tube and the paper cup and even add a paper border! Push some paper into the cup to help the flower from falling over.

Art Activity Intermediate to Challenging

Fun things to make and do with paper No.3 (Making paper flowers) Get ahead of summer and have some colourful flowers in your house to brighten up your day!

Tips – you can use a toilet roll tube instead of a paper cup. You can paint it a nice colour and add a fancy paper trim around the top of it. If you do not have any coloured paper, you can make your own by painting it or add colour using pens, pencils or crayons.

Pleat a strip of coloured paper. Pinch one end together and stick a strip of paper or Sellotape round to hold it.

Cut a long strip of coloured paper. Make cuts along the length as in the illustration. Roll up the paper and bend the petals back.

Materials needed:

Paper/polystyrene cup or a toilet roll tube or a flowerpot. Coloured paper. Glue/Sellotape. Straws, cotton bud. Scissors. Pencil.

Experiment with different petal shapes.

Cut out different shapes for leaves, long and thin, short and pointed. Score down the centre of the leaf and fold. Leaves are good for covering up joins between flowers and stems.

To make stems and fancy swirly parts, wrap a thin strip of green paper round a cocktail stick or a straw or a pencil.
